

열전달(공) (MECH405-01)

학기	2025년 1학기
담당교수	최경호
이수구분	교선평수
학점	3.0
강의시간	월14:30-16:00(E7 - L31), 수14:30-16:00(E7 - L31)
강의실	E7 207 (교수실)
소속	기초학부

교과개요

Mechanical engineers need a solid set of analytical and problem-solving skills as the foundation for tackling important societal issues relating to heat energy transfer. With dealing with theoretical and conceptual analysis of heat transfer, students in this course will learn that heat transfer phenomena is not only in our lives but also power device, refrigerators, electronic devices, building, and even food. In particular, based on the theory, a simple heat transfer project will be carried out.

교과목표

Through careful explanation of concepts and use of numerous practical examples, the students develop the necessary skills to bridge the gap between knowledge and confidence for proper application. Also, students will learn a wealth of real-world engineering examples and develop an intuitive understanding of heat transfer by emphasizing the physical arguments.

학습윤리

Mid-exam and final exams will be conducted open book & notebook, but will not be allowed discussion and communication through electro devices in the class.

교과정책(방침)

All students will be actively involved and spoken with each own voice in the class during the experiment.

준비물 및 기타

Recommended courses: Mechanical Thermodynamics (MECH 305).
