

박막재료공학(이,공) (MSE406-01)

학기	2025년 1학기
담당교수	이신범
이수구분	교선평수
학점	3.0
강의시간	화13:00-14:30(E2 - 524), 목13:00-14:30(E2 - 524)
강의실	E2 511 (이신범 교수)
소속	기초학부

교과개요

We will introduce fundamentals of materials science of thin films. This class is recommended for the students who are depositing and characterizing thin films.

교과목표

We will review state-of-the-art technologies for deposition and characterization of thin films. We will briefly study the structural, electrical, magnetic, and optical properties of thin films. Finally, We will review emerging thin film materials and their applications

교과정책(방침)

Midterm exam 50, Final exam 50.

Active class participation will give a bonus.

Attendance Pass/Fail. If your professor admits your urgent situations, including experiment, lab work, sickness, and so on, I will also admit your absence as attendance. Submit a one-page report with your professor's signature.
