교과개요

General Chemistry Laboratory I introduces fundamental laboratory techniques in chemistry. Students are expected to review safety precautions before each experiment. Throughout the course, students will perform prearranged experimental procedures, work collaboratively with classmates, and accurately collect and analyze experimental data. Emphasis is placed on proper laboratory practices and safety awareness to minimize accidents and maintain a safe learning environment.

교과목표

This course will help students develop the ability to apply safety practices in chemistry. Students will learn basic experimental techniques and precautions, and become familiar with common laboratory equipment. They will strengthen their understanding of chemical principles by accurately collecting, analyzing, and interpreting experimental data while maintaining proper laboratory practices and safety awareness.
