

일반화학실험 Ⅱ(이) (CHEM206-01)

학기	2026년 1학기
담당교수	Desta Kebede Taye
이수구분	교선�필수
학점	1.0
강의시간	수13:00-15:00(E6 - 222)
강의실	E7 L09 (교수실)
소속	기초학부

교과개요

General Chemistry Laboratory II builds on basic laboratory techniques and introduces more advanced methods used in chemical analysis. Students will review laboratory safety and experimental procedures, perform experiments involving solution preparation and standardization, spectrophotometry, gravimetric analysis, equilibrium, phase behavior, recrystallization, distillation, extraction, and melting point determination. Emphasis is placed on accurate data collection, proper laboratory practices, and safety awareness.

교과목표

This course will help students develop the ability to identify risks and apply safety measures in chemistry. Students will learn advanced experimental techniques and proper use of analytical equipment. They will strengthen their understanding of chemical principles by accurately collecting, analyzing, and interpreting experimental data while maintaining proper laboratory practices.

수업방법

English

학습윤리

Students must attend each experiment session. Reporting results without attendance may lead to dismissal or suspension from the course.

교과정책(방침)

Students must complete a preliminary report to review pre-lab content before each experiment. Experiments and result discussions must be conducted in groups, but reports must be submitted individually. Proper lab clothing is required. Wearing capes, flip-flops, sandals, or other open-toed shoes is prohibited.
