

강화학습(이,공) (CSE402-01)

학기	2026년 1학기
담당교수	이두석
이수구분	교선�필수
학점	3.0
강의시간	월16:30-18:00(E7 - L21), 수16:30-18:00(E7 - L21)
강의실	E7 204 (교수실)
소속	기초학부

교과개요

Reinforcement learning has recently attracted great attention as a general intelligence framework that can solve complex problems such as playing Go games, protein structure analysis, robot manipulation, and real-time simulation gameplay. This course reviews basic understanding of reinforcement learning, deep reinforcement learning algorithms, and recent developments. We will also implement various algorithms for deep reinforcement learning using Open-AI Gym and Tensorflow.

교과목표

Learning reinforcement learning theory, techniques and algorithms

수업방법

This class will do PBL(project based learning). In this class, you will learn the theory and many algorithms of RL also with the practical programming and will do some challenging project.

학습윤리

- Trust your own ability and own intellect.
- Don't copy someone's ideas, or works without citing the sources.
- Don't cheat during exams.
- Don't submit your assignments that have been done for another student or a previous class.

교과정책(방침)

-Basic manners: ·Come to class on time and be attentive and engaged in class. ·During class, refrain from using laptops, cell phones and other electronic devices. ·Students who copy assignments, allow assignments to be copied, or cheat on tests will fail the entire course. ·Plagiarism means using words, ideas, or arguments from another person or source without citation. Cite all sources referenced, whether or not assigned and quoted directly.
