|------|------------------------------------------------|
| 학기   | 2026년 1학기                                      |
| 담당교수 | 권혁준                                            |
| 이수구분 | 교선평수                                           |
| 학점   | 3.0                                            |
| 강의시간 | 월15:00-16:30(E7 - L20), 수15:00-16:30(E7 - L20) |
| 강의실  | E3 609 (교수실)                                   |
| 소속   | 기초학부                                           |

### 교과개요

- Students are introduced to both the theory and the practice of all basic manufacturing concepts. It covers all issues involved in manufacturing micro and nano electronic devices, including thin film process, lithography, and etching process as well as unit cell design rule.

### 교과목표

- The purpose of this course is to provide students with technical background on device fabrication process technology for Nanodevices.

### 수업방법

- Lecture

### 교과정책(방침)

- Credit for this course is NOT permitted if EE404 in the Electrical and Electronic track has already been taken.  
- Conversely, if you take this course, you will NOT be allowed to register for EE404 in the Electrical and Electronic track.
