

지리학 입문 (HSS114-01)

학기	2026년 1학기
담당교수	손센
이수구분	교선평수
학점	3.0
강의시간	월18:00-21:00(E7 - G01)
강의실	E7 L14 (교수실)
소속	기초학부

교과개요

Geography, as an interdisciplinary field bridging human and natural sciences, delves into the intricate relationships between people, the environment, and spatial arrangements. Geographers inquire into how the location of events influences their nature and causes on a global scale. This course aims to foster an appreciation of how societies structure their geographical surroundings and the emergence of distinct patterns in cultural and ecological landscapes. Through this introductory exploration, students will analyze the dynamic processes shaping spatial configurations worldwide, cultivating a spatial perspective essential for navigating complex challenges in our social and physical environments.

교과목표

1. Theoretically analyze the spatial distribution of human phenomena such as language, economic activities, and religion.
2. Demonstrate the influence of globalization on human activities and landscapes through relevant examples.
3. Evaluate geographical issues with critical written and oral communication skills.

수업방법

강의(lecture) 발표(presentation) 토론/토의(discussion)

학습윤리

Academic misconduct, including plagiarism and cheating during exams, could lead to receiving a failing grade (F) in this course.

교과정책(방침)

The use of mobile phones, internet for personal purposes, gaming, or studying for other subjects is prohibited during class. Students who accumulate more than four absences may receive a failing grade (F) for this course.
