

도시지리학 (HSS215-01)

학기	2026년 1학기
담당교수	손센
이수구분	교선평수
학점	3.0
강의시간	월15:00-16:30(E7 - 224), 수15:00-16:30(E7 - 224)
강의실	E7 L14 (교수실)
소속	기초학부

교과개요

The world's population predominantly resides in urban areas, where critical issues such as social polarization, urban restructuring, poverty, and the emergence of satellite and innovation cities are prevalent. This course investigates the internal spatial dynamics of cities and their interconnectedness within the global urban system. It seeks to comprehend the multifaceted roles of cities, the impact of urban structures on people's lives, and how individuals shape urban spaces for various objectives. Through this exploration, students will gain a deeper understanding of urban life and envision the future of 'smart cities.' Additionally, they will appreciate the diversity among global metropolises and megacities worldwide.

교과목표

At the end of this course, students should be able to:

1. Articulate key concepts and theories in urban geography, encompassing topics such as Central Business District (CBD), inner-city dynamics, urbanization trends, central place theory, gentrification, and segregation.
2. Interpret urban landscapes and grasp the spatial processes and functions contributing to their configuration.
3. Comprehend various approaches and perspectives within urban geography, including the Chicago School of thought, postmodernism, environmentalism, spatial analysis, and urban political economy. This understanding extends to their implications for city planning, formation, and design.

수업방법

강의(lecture) 발표(presentation) 토론/토의(discussion)

학습윤리

Academic misconduct, including plagiarism and cheating during exams, could lead to receiving a failing grade (F) in this course.

교과정책(방침)

The use of mobile phones, internet for personal purposes, gaming, or studying for other subjects is prohibited during class. Students who accumulate more than four absences may receive a failing grade (F) for this course.
