

## 세포생물학(이) (LS204-02)

|      |                                                |
|------|------------------------------------------------|
| 학기   | 2026년 1학기                                      |
| 담당교수 | 백명인                                            |
| 이수구분 | 공통필수                                           |
| 학점   | 3.0                                            |
| 강의시간 | 월13:00-14:30(E7 - 236), 수13:00-14:30(E7 - 236) |
| 강의실  | E4 511 (교수실)                                   |
| 소속   | 기초학부                                           |

### 교과개요

This class introduces basic cell biology, including basic cellular organelles, structures, experimental technologies, and also diseases and systems at the cellular levels. Also this class will introduce a little bit of molecular biology. Thus, this class will function as the core class for those who plan to have 'biology' as their major.

### 교과목표

- Learn the basic cellular organelles and structures.
- Understand the basic principles by which cells maintain their functions and integrity.
- Understand how the cellular behavior is associated with organismal level of health and diseases.

### 학습윤리

Integrity and active participation are must. Electronics are prohibited.

### 교과정책(방침)

모든 생명과학의 기본 과목이므로 성실한 학습이 필요함 정영태 교수와 백명인 교수가 교대로 강의를 진행할 예정
