

양자역학 I (이,공) (PHY304-01)

학기	2026년 1학기
담당교수	박기성
이수구분	교선평수
학점	3.0
강의시간	월09:00-10:30(E7 - 223), 수09:00-10:30(E7 - 223)
강의실	E2 213 (교수실)
소속	기초학부

교과개요

This course covers the background of quantum mechanics, wave mechanics using Schrodinger equation for understanding fundamental assumptions, representation with operators and matrices, application to studying the physical properties of microscopic world including harmonic oscillators, angular momentum and spin, hydrogen atom, and others.

교과목표

Describe Schrodinger equations in three dimensional space and solve these equations for a hydrogen atom.
Understand the representation with operators and matrices in Quantum mechanics
