

전기역학Ⅱ(이) (PHY308-01)

학기	2026년 1학기
담당교수	유천열
이수구분	교선평수
학점	3.0
강의시간	화10:30-12:00(E2 - 525), 목10:30-12:00(E2 - 525)
강의실	
소속	기초학부

교과개요

This course is the second part of electrodynamics. It begins with a review of electrostatics and magnetostatics. Then we will discuss the electrodynamics and Maxwell's equations, followed by conservation laws of charge, energy and momentum. The course then proceeds to electromagnetic waves and their interaction with matters, leading to optical properties of matters. Finally, we will study time-varying fields and radiation.

교과목표

This course aims to establish a fundamental concept of electrodynamics.
