

다변수 미적분학 (BS101-01)

학기	2026년 2학기
담당교수	이두석
이수구분	공통필수
학점	3.0
강의시간	화16:00-18:00(E7 - 223), 목16:00-18:00(E7 - 223)
강의실	E7 204 (교수실)
소속	기초학부

교과개요

The concepts of limit, derivative, and integral of single-variable functions are extended to multivariate functions and their applications. And this course deals with the basic concepts of 3 by 3 matrices, solving simultaneous ordinary differential equations using matrices, defining multiple integrals, understanding the physics of vector field integration, learning theories such as Stokes' theorem and divergence theorem, and learning Maxwell's equations. Also deals with how to derive fluid dynamics equations by applying the integral theorems.

교과목표

Understand the concepts of differentiation and integration of multi-variable functions

수업방법

Lectures, exercises, matlab labs

학습윤리

Please pay attention to your words and actions in your relationships with professors, teaching assistants, and colleagues, maintain relationships through communication, and try to be polite to each other.

교과정책(방침)

- If you cheat on exams and quizzes, your grade will be F. - Assignments must be completed and submitted within the deadline (20% deduction for delayed submission) (In case of plagiarism, no score is given once, F is given more than twice) - Penalty points for interrupting class, such as use unrelated to class, disruption, frequent movement, etc. (1-10 points per case / (100 total points) deduction)
