

생명과학개론 (BS114-02)

학기	2026년 2학기
담당교수	Felix Jonas
이수구분	공통필수
학점	3.0
강의시간	화10:30-12:00(E7 - 223), 목10:30-12:00(E7 - 223)
강의실	R5 303호 (Nam Laboratory for Complex Biology)
소속	기초학부

교과개요

The course introduces the student to the key concepts and principles that govern life on earth.

교과목표

- Understand the molecular and cellular basis of life
- Describe the differences and similarities between pathological and physiologic processes.
- Analyse the complexity of life on earth and its origin
- Evaluate the importance of recent advances in the life sciences for society.

주차별 강의계획

- 1주차:Introduction
- 2주차:Water & other molecules of life
- 3주차:Nucleic Acids & Proteins
- 4주차:Carbohydrates
- 5주차:Molecular Interaction
- 6주차:Origin of Life
- 7주차:Structure of the cell
- 8주차:Energy
- 9주차:Cellular respiration
- 10주차:Signal transduction
- 11주차:DNA replication
- 12주차:Transcription
- 13주차:Translation
- 14주차:Immunity
- 15주차:Cancer
- 16주차:Recent developments

수업방법

Frontal lectures mixed with interactive discussions and problem based learning.

학습윤리

The course aims to convey knowledge and teach critical thinking. Use of AI is thus generally discouraged and only permitted if explicitly mentioned.

준비물 및 기타

Campell Biology and selected research literature
