

일반생물학 실험 (BS115-01)

학기	2026년 2학기
담당교수	이석규
이수구분	공통필수
학점	1.0
강의시간	월16:00-18:00(E4 - 224)
강의실	E4 409 (구재형 교수)
소속	기초학부

교과개요

Molecular biology and bioinformatics experiments and experiments essential for modern life science research
Understand the basics of modern molecular biology experiments by performing practical exercises. In particular, students practice scientific methodology of biological research and experiments encompassing microbiology, molecular biology, and bioinformatics through an actual molecular biology project consisting of several modules.

교과목표

To learn basics of general biology and molecular biology lab.

수업방법

Experiments

학습윤리

1. Write your own report without help from others. 2. Be sure to submit the result report within the deadline.

교과정책(방침)

1. Write your own report without help from others. 2. Be sure to submit the result report within the deadline.
