

이동현상개론(공) (CE302-01)

학기	2026년 2학기
담당교수	이종민
이수구분	교선평수
학점	3.0
강의시간	월16:30-18:00(E7 - 229), 수16:30-18:00(E7 - 229)
강의실	
소속	기초학부

교과개요

The following contents are introduced (1) Interpretation of heat transfer, (2) Molecular basis of diffusion in gas, liquid, polymer, and solid, (3) Condition description of diffusion in binary and multi-component mixtures with and without chemical reactions.

교과목표

● Analysis of chemical engineering operations involving heat. ● Understanding heat transfer, especially in the chemical process. ● Understanding mathematical models for heat and mass transfer. ● Applying mathematical models on real heat and mass transfer.
