

객체지향 프로그래밍 (이.공) (CSE201-01)

학기	2026년 2학기
담당교수	김백규
이수구분	교선평수
학점	3.0
강의시간	월15:00-16:30(E7 - 233), 수15:00-16:30(E7 - 233)
강의실	E3 211 (교수실)
소속	기초학부

교과개요

Object-oriented programming is one of the programming paradigms that involves designing and programming centered around objects. In this course, you will learn the concepts of object-oriented programming through C++, one of the languages that supports object-oriented concepts, and understand how to apply these concepts through project execution.

교과목표

- ☐ Learn the basic syntax of C++, one of the object-oriented languages, and use it to understand the basic concepts of object-oriented programming.
- ☐ Study object-oriented design methods and practice and implement them through projects.

주차별 강의계획

- 1주차: Introduction to Object-Oriented Programming and Basics of C++
- 2주차: Pointers, Arrays, Structures
- 3주차: Memory Allocation, Input/Output
- 4주차: Class Abstraction and Encapsulation
- 5주차: Inheritance, Polymorphism
- 6주차: Operator Overloading
- 7주차: Virtual Functions, Multiple Inheritance
- 8주차: Midterm Exam
- 9주차: Exception Handling and Testing
- 10주차: C++ Standard Library, Strings, Streams
- 11주차: Algorithms, Iterators, Function Objects
- 12주차: Object-Oriented Design
- 13주차: Design Patterns
- 14주차: Group Presentations
- 15주차: Review / Guest Lectures
- 16주차: Final Exam

수업방법

Lecture, Assignments, Term Project

학습윤리

If any violations of academic ethics, such as cheating, are discovered, the student will be excluded from the course and given a failing grade.

교과정책(방침)

- ☐ Class attendance is important
- ☐ Since it is difficult to develop C++ programming skills through lectures alone, individual practice must be conducted concurrently.

준비물 및 기타

Programming Practice Environment (Personal Computer)
