

운영체제(공) (CSE304-01)

학기	2026년 2학기
담당교수	이용우
이수구분	교선평수
학점	3.0
강의시간	월16:30-18:00(E7 - 236), 수16:30-18:00(E7 - 236)
강의실	E3 214 (교수실)
소속	기초학부

교과개요

The goal of this course is to provide an introduction to the internal design and operation of modern operating systems.

교과목표

This course introduces the basic concept of operating systems, which includes process management, memory management, file systems, and I/O management, and provides a detailed explanation of how those concepts are designed and implemented in modern operating systems. In addition to this, this course provides a set of comprehensive programming homeworks and laboratories to help students improve practical system programming skills in UNIX-like operating systems (e.g., GNU/Linux).

학습윤리

Penalty for cheating: Removal from course with failing grade.

교과정책(방침)

Prerequisite: Students must be familiar with C or C++ programming.
