

Scientific Writing (HSS301a-02)

학기	2026년 2학기
담당교수	Benjamin Wilson Riley
이수구분	공통필수
학점	3.0
강의시간	화10:30-12:00(E7 - G03), 목10:30-12:00(E7 - G03)
강의실	E7 L16 (교수실)
소속	기초학부

교과개요

This course is designed to help students understand the fundamentals of effective scientific and technical writing and to produce a short research paper as the final project. The course consists of two main phases: Lecture/Discussion and the Writing Project. In the first part of the semester, students learn the foundations of academic research writing such as research ethics and plagiarism, paraphrasing and referencing, academic style; they will also explore the structure of scientific writing and discursive features specific to scientific writing by surveying published research papers in the science and technology fields. Building on this foundation, students learn how to compose each section of a research paper centering on content development, key vocabulary, discourse organization, and relevant syntax. They draft their own papers step by step and engage in multiple rounds of revision through peer and instructor feedback. A process-oriented approach to writing is emphasized throughout the course.

The course also incorporates reflective engagement with digital writing tools. Students may use tools such as machine translation, generative AI, and other writing platforms to support their writing. At the end of the semester, students deliver a brief reflection on their writing process and digital tool use to promote transparency, responsibility, and awareness in academic writing.

교과목표

The aim of this class is to help improve your scientific and technical writing skills. You should eventually be able to research, organize, and write technical and scientific material in a way that can be understood by your intended audiences.

By the end of this course: Students will be able to

- understand structure of scientific writing and its discursive features;
- write effectively, concisely, and clearly for an academic paper;
- write a short research paper of their interest; and
- demonstrate their understanding about ethics in the academic world.
- critically and transparently monitor and reflect on their use of digital writing tools, including generative AI, while maintaining academic integrity and authorship.

학습윤리

Academic Conduct Policy

Academic dishonesty in any form will not be tolerated. Violations of these rules will result in a record of the violation being placed in your file and you may also receive a failing grade for the course. Confirmation of such incidents can also result in expulsion from the University.

Academic Dishonesty includes:

□Unauthorized assistance: Using unauthorized materials, information or study aids in any academic exercise unless specifically authorized by your professor.

□Presenting material (through written, visual, electronic or oral means) which has not been studied or learned, but rather was obtained through someone else's efforts and used as part of an examination, course assignment or project.

□Falsifying or misrepresenting your academic work.

□Plagiarism: Whereby another's work or ideas are used without any indication of the source, thereby attempting to convey the impression that such work is the student's own. (go to <http://www.plagiarism.org/> ; <https://www.copykiller.co.kr/notice> ; <http://citationstyles.org/> ; or <http://endnote.com/downloads/styles> to get more information on plagiarism and how to avoid it)

□Multiple Submissions: Submitting the same academic work for credit more than once without the express permission of the professor.

□Any student who knowingly helps another violate academic behavior standards is also in violation of the standards.

교과정책(방침)

Attendance Policy:

All classes are mandatory and must be attended. If you are unable to attend class, you need to advise your professor at least 24 hours prior to your intended absence. If you have a reasonable excuse for your absence you will be given an excused absence. An excused absence does not negatively affect your final grades, however repeated absence (excused or not) may result in a warning from your professor after which any further absences may lead to being awarded an unsatisfactory grade for the course.

If you miss class due to ill-health, provide a medical certificate to your professor during the first class after your return. If you are absent without a reasonable excuse, you will be marked as absent from the session. If you are marked absent SIX or more times during the semester you will receive a grade of unsatisfactory for the course. Please arrive on time for all class meetings. THREE late arrivals will result in being marked as an unexcused absence. Arriving more than 15 minutes after the start of class will automatically be marked as an unexcused absence.

Late Work Policy:

There are no make-ups for work completed in class. Any work not completed during class time must be completed by the due date set by your professor.

If you miss classes due to ill-health or for any other excused absence it is YOUR responsibility to find out what

work was completed during the classes you missed and complete that work by the due date set by your professor. Only in the case of an excused absence will you be allowed to give your in-class semester speech at another date. However, this will result in a slight deduction in your grade for that assignment. Please try to be present on your assigned speaking days.

Group Work Policy:

Everyone must take part in group projects. You will be allocated to a group for various assignments throughout the semester. All members of a group will receive the same score; that is, the assignment is assessed and everyone receives this score. For certain group assignments, you will work in groups but you will be assessed both as a group and individually.
