### 교과개요

This course is about genes –their structure and function – therefore, students will study nucleic acid structure and the mechanics of replication, repair, transcription, and translation in bacteria, archaea and eukaryotes.

### 교과목표

The goal of this course is understanding gene regulation at all levels, and the structure-function relationships of nucleic acids and proteins.

### 준비물 및 기타

Molecular Biology (5th ed.), Robert F. Weaver, 2011, McGraw Hill
