교과개요

This course covers kinematics and kinetics of particles (Newton's law; energy and momentum methods; systems of particles) and kinematics and kinetics of planar motions of rigid bodies (plane motion of rigid bodies; mechanical vibrations). Students will obtain an understanding of Newton's Laws of motion, and the ability to apply energy and momentum methods to particles and rigid bodies in planar motion.

교과목표

The objective of this course is to develop an understanding of the dynamics of mechanical systems.
