

재료열역학 개론(이.공) (MSE302-01)

학기	2026년 2학기
담당교수	인수일
이수구분	교선평수
학점	3.0
강의시간	화17:30-20:30(E7 - G01)
강의실	
소속	기초학부

교과개요

This course offers the thermodynamic principles to understand the behaviors and properties of materials according to thermodynamic variables such as temperature, pressure, and composition. It will cover (1) laws of thermodynamics, (2) chemical reactions in solid, liquid, and gas phases, (3) Gibbs free energy and phase equilibrium, (4) Phase diagrams.

교과목표

Understand the thermodynamic principles about the first, the second, and the third laws of thermodynamics, enthalpy and entropy, chemical reactions in solid, liquid, and gas phases, phase equilibrium, behavior of solutions, Gibbs free energy and phase diagrams.

수업방법

On-site or online lectures

학습윤리

- It is not allowed to unauthorized assistance on all assignments and exams.
- It is not allowed to misrepresent your identity.

교과정책(방침)

- Handouts and reference papers will be provided.
- If the attendance in the lecture is lower than 1/3 of course, the grade will be lowest.
