

재료공학개론Ⅱ(이,공) (MSE306a-01)

학기	2026년 2학기
담당교수	이신범
이수구분	교선평수
학점	3.0
강의시간	화13:00-14:30(E2 - 525), 목13:00-14:30(E2 - 525)
강의실	E2 511 (이신범 교수)
소속	기초학부

교과개요

The purpose of this course is to provide a conceptual framework for understanding the materials properties. It attempts to present a general picture of the nature of materials and the mechanisms that act upon, modify, and control their properties.

교과목표

We will study the electrical, magnetic, optical, and chemical properties of materials. We will briefly review emerging ceramic materials and their applications.

수업방법

- 7. Mechanical properties
- 8. Deformation and strengthening mechanisms
- 9. Failure
- 12. Electrical properties
- 16. Corrosion and degradation of materials
- 17. Thermal properties
- 18. Magnetic properties
- 19. Optical properties
- 20. Economic, environmental, and social issues in materials science and engineering

학습윤리

Recording is not allowed.

교과정책(방침)

Midterm exam 50, Final exam 50, Attendance Pass(>3/4)/Fail,

Active class participation will upgrade the grade.

If your professor admits your urgent situations, including experiment, lab work, and sickness, you should submit a one-page report with your professor's signature.

준비물 및 기타

Fundamentals of materials science and engineering
(W. D. Callister, Jr. and D. G. Rethwisch)
